Education

- **Rochester Institute of Technology** Dubai, UAE
  Bachelor of Science in Cyber Security *2025*

Experience

- **Malcrov** Dubai, UAE
  Intern *March 2022 – September 2022*
  - **Network Security Training**: Experience with use of Burp Suite, Snort, Suricata, and OSSEC for web security testing, intrusion detection, system scanning, and log analysis
- **Rochester Institute of Technology** Dubai, UAE
  Student Researcher *June 2023 – November 2023*
  - **Machine Learning for Mobile Security**: Conducted research under a professor on the use of machine learning to detect spyware in mobile users based on anomalous microphone and camera usage. Developed Android RATS to simulate spyware behavior and designed a detection model using system call analysis.
- **Rochester Institute of Technology** Dubai, UAE
  CPTC, Pentester *2024*
  - **Collegiate Penetration Testing Competition (CPTC)**: Competed as part of the RIT team in the CPTC Regional Qualifier 2024; aided with team training and conducted the penetration test on a provided environment and securing 2nd place.

Projects

- **OnClickTicket** Web Application
  Developed a web application using ASP.NET.
  - Implemented authentication to restrict access.
  - Built user entity framework with filtering, sorting, and search.
  - Implemented SQL database using Entity Framework.
  - Integrated URL routing and Bootstrap themes; implemented full CRUD.
- **Secure Company Environment** Active Directory
  Built a secure Windows Server environment with Active Directory.
  - Integrated Wazuh IDS for real-time threat detection.
  - Configured firewall rules for network protection.
- **Secure Company Environment** Cybersecurity Tool
  Rust-Based Command and Control framework.
  - Designed and implemented a secure command-and-control server and client in Rust using TCP and JSON-based communication.
  - Integrated muliplayer capability with asynchronous client handling and session spawing using `Tokio`
  - TLS encryption via `rustls`, with runtime certificate generation and management using a `cert.rs` module for client authentication
  - Followed Agile methodology with weekly sprints to plan, develop, and test.

Skills

- **Programming languages**: Python, C/C++, Rust, Java, x86 Assembly, JavaScript, SQL, Shell Scripting
- **Markup languages**: HTML, Markdown, LaTeX
- **Security tools**: Nmap, Metasploit, Gobuster, Bloodhound, CrackMapExec, Impacket, Burpsuite, Wireshark, Ghidra, IDA, dnSpy, Wazuh IDS
- **Development tools**: Git, Docker, MySQL, SQLite, Nginx, VirtualBox, VMWare, Pycharm, VS Code
